

Erick M. Herrera Cabrera

Full-Stack Software Developer

erickmherrera@outlook.com | 719-922-5372 | Colorado Springs, CO

 [LinkedIn](#) |  [GitHub](#) |  [Portfolio](#)

Professional Summary

Results-driven Full-Stack Developer with 2+ years of experience building scalable software applications using modern frameworks. Proven track record of process optimization and automation, having reduced manual processing time by 40% through innovative solutions. Strong background in both frontend and backend development with expertise in React, Node.js, and database management.

Leveraging AI tools:

- Cursor
 - OpenCode
 - Claude
-

Technical Skills

Frontend Development

- React.js, React Native, Next.js, Tailwind
- HTML5, CSS3, JavaScript (ES6+), TypeScript
- Responsive Design, Bootstrap, UI/UX principles
- C++
- QT framework (c++)

Backend Development

- C++
- Node.js, Express.js, RESTful API design
- Python scripting and automation

- Database design and optimization (MongoDB, MySQL, SQLite)
- Authentication, authorization, and security best practices

Development Tools & Practices

- Embedded systems (Arduino/Elegoo)
 - Certified with Arduino
 - Git version control, GitHub
 - Docker containerization
 - Agile methodologies
 - Testing frameworks and debugging
-

Professional Experience

CSR | Keysight Technologies 2023 – Present

- Applied Kaizen to my day to day activities.
- Implemented automation script for repetitive tasks
- Used DMAIC to offer improvements and solutions for waste I found in my process.

Business Process Analyst | Keysight Technologies 2021 – 2023

- **Data-Driven Process Improvement:** Directed continuous improvement initiatives by conducting waste walks and value stream mapping, utilizing Python (Pandas) and SQL to analyze operational bottlenecks and establish baseline metrics for the inbound email processing area.
- **Process Automation:** Spearheaded the automation of inbound email processing, serving as a Subject Matter Expert (SME) to integrate Salesforce capabilities with Microsoft Power Automate, resulting in significant reduction in manual data entry time.
- **Governance & Reporting:** Developed, reviewed, and audited detailed process work instructions to ensure quality and compliance. Built Microsoft Power BI dashboards to monitor ongoing process adherence and testing cycle outcomes.

CSR / CTA | Keysight Technologies 2020 – 2022

- Applied Kaizen to my day to day activities.
- Used 5 why's to offer improvements and solutions for waste I found in my process.
- Offered excellent customer service with attention to details for high profile clients.

US Coast Guard | Intelligence Specialist (IS) 2016 – 2018

- Served as an Intelligence Specialist (IS) assisting in intelligence briefing drafts and communicating intelligence information to the chain of command across multiple federal

organizations.

Personal Projects

Cloud Gear Rental Platform (*CloudMG*) | *TypeScript* | [GitHub Link](#)

- Developed a P2P outdoor sports equipment marketplace using React Native, utilizing its New Architecture (Fabric/TurboModules) for high-performance cross-platform mobile experience.
- Designed a scalable backend architecture with Supabase and PostgreSQL to manage complex rental transactions, inventory metadata, and real-time user engagement.
- Implemented secure financial and identity verification orchestration via Stripe Connect.

Cryptocurrency Wallet | *C++* | [GitHub Link](#)

- Cross-platform cryptocurrency wallet designed for secure and easy management of your digital assets. It's built with a modern, intuitive user interface using the Qt Framework and is configured for cross-platform compilation using CMake.
- Utilizes industry-standard cryptographic libraries for secure and reliable transactions.
- Built with CMake to ensure compatibility across various operating systems, including Windows, macOS, and Linux.

HVAC SaaS Web Application | *MERN Stack* | [GitHub Link](#) |

- Developing a comprehensive inventory management system for HVAC companies
- Implemented advanced search functionality across multiple data tables
- Built responsive React frontend with real-time data updates
- Designed RESTful APIs with Node.js and Express.js
- Integrated MySQL for efficient data storage and retrieval
- **Technologies:** React, Node.js, Express.js, MySQL, Tailwind CSS

Personal Portfolio Website | *Next.js* | [GitHub Link](#) |

- Built modern, responsive portfolio showcasing technical projects and skills
 - Integrated contact form with backend API endpoints, and automatic reply system
 - **Technologies:** Next.js, React, TypeScript, Tailwind CSS
-

Education

Bachelor of Science in Computer Science | *SNHU*

- Concentration: Software Development
-
